

2 Gel Mini PAGE

Cat No: VGE-M-001

MOLEQULE-ON[®]

Description

The MOLEQULE-ON 2 Gel Mini PAGE is the ideal unit for routine protein electrophoresis. The 2 Gel is constructed using the latest injection molding manufacturing techniques. This gives a high quality, low cost product with unsurpassed finish, durability and strength. The unit incorporates a sealing system, which is compatible with all major types of 8 X 10 cm and 10 x 10 cm two precast gel. Gel casting and running utilize the same insert, no transfer of glass plates during gel casting is necessary. The insert contains the option of sliding clamps or just one screw per clamping bar side allowing very rapid set up of both hand cast and precast gels. Ultra soft silicone seals and pressure bars, which surround the glass plates, guarantee leak proof gel casting. The glass plates are 2mm thick to prevent breakage and have bonded spacers for handiness.

Features

- Injection molded construction
- Compatible with all 8 x 10 and 10 x 10cm precast gels (W x H)
- Rapid gel casting and loading
- Low buffer volumes
- Rapid set up cooling
- Run up to two gels

Specifications

Plate Dimensions (W x L)	10 x 10 cm
Gel Dimensions (W x L)	7.5 x 8 cm
Unit Dimension (W x D x H)	19 X 13 x 15 cm
Maximum Samples	40 Samples
Capacity	20 Samples per gel
Buffer Volume	Min 250 ml, Max 1200 ml
