| 2.0ml Cryo Tube | MQ-BSCV-2.0-100 |
| 4.0ml Cryo Tube | MQ-BSCV-4.0-100 |

MOLEQULE-ON[®]

Description

MOLEQULE-ON cryotubes are made of high-quality PP material. It can withstand low temperature of -196°C , and can be stored in liquid nitrogen for low-temperature sample storage. The unique tube design makes the sample not produce stress response in liquid nitrogen and is not affected when thawing. The optimized design of the bottom of the tube wall makes the sample easy to take out. Free of DNase, RNase and pyrogen.

Features

- Sterile, free from nuclease and pyrogen.
- Self-standing.
- Internal thread.
- High quality polypropylene.
- Natural
